Professional Summary

Enthusiastic Machine Learning Engineer with expertise in deep learning, model optimization, and computer vision. Passionate about building intelligent solutions for real-world challenges.

Skills

Python, TensorFlow, Keras, PyTorch, OpenCV, Scikit-learn, NumPy, Pandas, NLP

Professional Experience

ML Engineer | AI Vision Labs | June 2023 - Present

- Developed CNN models for image classification with 92% accuracy.
- Worked on NLP-based chatbot for automated customer support.
- Optimized deep learning models to reduce inference time by 40%.

Education

B.Tech in Artificial Intelligence | VIT, Pune | 2019 - 2023 | CGPA: 8.8/10

Projects

Image Classification Model - TensorFlow, Keras

Trained CNN models on medical image datasets for anomaly detection.

Chatbot using NLP - Python, NLTK, Flask

Created an AI-powered chatbot capable of contextual responses.

Certifications

TensorFlow Developer Certificate, IBM Machine Learning Professional Certificate

Languages

English (Fluent), Hindi (Native)
